

1. Sarah Johnson (Senior TypeScript Developer)

Summary: Sarah has over 6 years of experience as a full-stack developer, specializing in TypeScript. She has led teams in building enterprise-level applications, focusing on clean, maintainable code and scalable architectures. She has worked closely with DevOps teams for continuous integration and deployment, ensuring smooth workflows for complex projects.

Experience:

Lead TypeScript Developer at XYZ Corp (4 years): Led a team of 10 developers in building a cloud-based application for financial data management using TypeScript, React, and Node.js. Developed scalable microservices and integrated third-party APIs for real-time data updates. Worked with Agile methodologies to ensure regular sprint reviews and code quality.

Full-Stack Developer at ABC Tech (2 years): Built and maintained a highly interactive e-commerce platform using TypeScript and Angular. Collaborated with cross-functional teams to design and implement RESTful APIs and manage state using Redux. Ensured mobile responsiveness and improved page load times by optimizing frontend assets.
